

FACTSHEET

Arlistrom

An environmentally friendly liquid fertiliser providing Potash, Sulphur and Sodium aiding protein development and plant health.

What's in it?

	Kg/Ha
Rate	26t/ha
K	42
S	330

	Units/acre
Rate	2300g/acre
K	34
S	264

This product is derived from the cleaning and preparation of vegetable fibres that are used to produce tea bags. Following a full site assessment and registration we deliver in articulated tankers and spread using an umbilical cord system or vacuum tanker. Ideally suited to light or sandy soils that are inherently low in potash. Can be stored in slurry lagoons to guarantee supplies.

- Recommended for Grass , Maize and Cereals
- Reduce the need for expensive artificial fertilisers
- Soils analysed every 4 yrs
- Delivery and spreading included
- Improve palatability of grazed grass
- Can be used with Biosolids or Commercial products
