

FACTSHEET

An environmentally friendly liquid fertiliser providing a combination of readily available and slow releasing nutrients to aid plant growth.

What's in it?

	Kg/Ha					
	Total	Avail	Total	Avail	Total	Avail
Rate	93t/ha		125t/ha		150t/ha	
N	150	37	200	50	240	60
P	32	16	43	22	52	26
K	57	51	76	68	92	82

This product is derived from recycled sludge produced in a number of food, beverage and dairy factories in the North West. Following a full site assessment and registration we site temporary storage tanks in suitable locations and deliver with articulated tankers. An umbilical cord system delivers the products to our tractor mounted injection equipment where in a single pass we lift and aerate whilst delivering fertiliser directly into the soil.

- Recommended for Grass and Maize
- Soils analysed every 4 yrs
- Delivery and spreading included
- Injected at plant roots
- Flatlift breaks pan and aerates
- Slow releasing
- Reduce the need for expensive artificial fertilisers
